EDUCATION

MSc in Finance

Nova School of Business & Economics
2026 – 2027 | In progress

MSc in Applied Mathematics

FCUL – Ciências de Lisboa

2025 (Transitioned to Finance)

Coursework: Stats, Probability, Data Science, Advanced Analysis, OR Models.

BSc in Physics

FCUL – Ciências de Lisboa

2022 – 2025 | Minor in Comp. Eng.

TECHNICAL SKILLS

PROGRAMMING & DATA:

Python (Pandas, NumPy), SQL, Power BI, Excel (advanced)

ANALYTICS & FINANCE:

Risk analysis, financial modelling, data visualization, KPI reporting, business analytics

TOOLS:

GitHub, VS Code, LaTeX, SAS/Viya, Figma

PROFESSIONAL SKILLS:

Analytical reasoning, problem-solving, communication, teamwork, process improvement

Online Portfolio:

Diogo Gil

FINANCE STUDENT (NOVA SBE) WITH ANALYTICAL & TECHNICAL BACKGROUND

PROFESSIONAL PROFILE

Analytical and driven Finance student with a strong background in Physics, Applied Mathematics and Computer Science. Experienced in risk analysis, data-driven decision-making and process automation. Skilled in Python, SQL, Excel and Power BI, with a track record of improving operational efficiency and supporting business teams. Motivated to pursue roles in finance, risk, consulting and data-oriented environments.

PROFESSIONAL EXPERIENCE

BNP Paribas — Rising Talents — Risk Trainee

Oct 2025 – Sep 2026

- Selected for BNP Paribas' competitive Rising Talents program, aimed at developing future leaders in risk management.
- Migrated legacy SAS risk processes to Python, improving maintainability and reducing dependency on legacy systems.
- Automated monthly reporting processes, reducing manual work by 20 hours.
- Contributed to portfolio monitoring, risk analysis, and scenario assessment in consumer finance.
- Collaborated with cross-functional teams, gaining hands-on exposure to operational risk frameworks.

Physics & Mathematics Tutor – Freelancer

Oct 2023– May 2025

- Tutored secondary and early university students in Physics and Mathematics.
- Helped students strengthen analytical reasoning and problem-solving skills.

Waiter – Bank & La Cantina Restaurants

Summer 2022 & Summer 2023

- Worked in fast-paced environments requiring multitasking, customer service and teamwork.

TECHNICAL & ANALYTICS PROJECTS

Quantitative Market Risk Dashboard

Independent Project

Built a Python/Streamlit dashboard for real-time risk monitoring, improving visibility over market exposures. Implemented risk metrics (VaR, CVaR) and stress scenarios, enabling clearer communication of risk insights to business teams.

EatSimple — Personalized Nutrition Engine

Startup Project

Developed a customizable nutrition engine for a startup project. Designed backend logic, database models and an analytics dashboard to track user behaviour and improve product decision-making.

Early Universe Galaxy Spectral Analysis

JWST Research Project

Analyzed high-redshift galaxy spectra from the James Webb Space Telescope using advanced spectral fitting, applying statistical regressions to infer gas environments and stellar properties.

SELECTED SPECIALIZED CERTIFICATIONS

YALE UNIVERSITY

Financial Markets

COLUMBIA UNIVERSITY
